01 — COMPANY OVERVIEW

What is Aiprosol?

Aiprosol is a UK-based global AI automation consultancy. It operates as a borderless, self-serve-first business. The model is built so that the majority of visitors purchase products or plans directly, without needing a discovery call. Calendly discovery calls are reserved exclusively for enterprise-level enquiries or genuinely confused users — they are never the primary CTA.

Arora — The AI CEO Persona

Arora is the face and voice of Aiprosol. She is the AI CEO — not a chatbot, not a mascot, but the operational lead. Her persona must appear consistently across the site: the hero avatar (spinning double-ring frame, cyan "A" monogram), the chat widget ("Arora is online"), the ROI report ("Generated by Arora"), and all outward-facing copy. She must never be called Claude, Mama, or any other name within this project.

Critical Technical Rules

1. Always use PUT (not PATCH) for CMS image fields — PATCH wraps URLs in {"stringValue":"url"} which breaks rendering
2. PUT replaces the ENTIRE item — always include ALL fields in every PUT request
3. All CMS queries MUST include options: { suppressAuth: true } for public access
4. Image fields must be plain string URLs — never objects
5. Direct browser fetch to api.anthropic.com is blocked by CORS — use fallback logic or server-side proxy
6. WixSiteBuilder tool returns 401 from outside the editor — all visual changes must go through Kid
7. Wix Custom HTML: styles must be injected inside container.innerHTML — not as JSX children
8. All onclick handlers in injected HTML must use window.functionName syntax
9. Kid cannot do visual editor actions — all Kid instructions must be exact named code changes
10. Kid frequently reverts to previous logic on complex features — prompts must be explicit and self-contained

04 — CMS ARCHITECTURE — ALL 14 COLLECTIONS

All collection IDs are exact lowercase, no hyphens, no spaces. Always query with suppressAuth: true.

10 — STRATEGIC PRINCIPLES

Self-Serve First

Most visitors must purchase products or plans directly. The funnel is: ROI Audit → product/plan purchase. Discovery calls are a last resort, not a primary CTA.

Calendly — Enterprise Only

The Calendly booking link (calendly.com/srijanpaul219/30min) must only appear inside the ROI Audit report for enterprise-tier users. It must not appear in hero sections, navbars, or general CTAs.

Global — Borderless

No Edinburgh, UK, or geographic references anywhere. Aiprosol is a global company. All copy, case studies and positioning must be geographically neutral.

Currency GBP

All prices are in British Pounds (£). Never use USD or show \$ symbols.

Platform Locked — Wix Vibe

Do not suggest moving to Netlify, Base44, Webflow, or any other platform. Everything must work natively within Wix Vibe.

Arora Is the Face

Arora must be present and prominent throughout the site. She is the AI CEO, not just a chatbot. Her persona drives trust, personalisation and conversion.

Revenue Is the Priority

Aiprosol currently has zero confirmed revenue. Every decision must be evaluated through the lens of: does this help generate the first sale?

Chat-First Rule

Arora (CEO) delivers all work directly in chat first. No changes are pushed to Notion, Wix, Gmail, Calendly, or any external platform unless Srijaan explicitly instructs it.
